

Organic Blue Butterfly Pea Flower Powder

Organic butterfly pea pollen is made from dried butterfly pea flowers. The butterfly pea flower, also known as blue butterfly, is rich in vitamins A, C, and E, which can improve immunity, help, and promote skin elasticity and collagen production. People in Southeast Asian countries often use it to make tea. Butterfly pea flowers contain natural anthocyanins. After drying, soak in water. The water turns blue. Adding lemon juice will turn it into purple. It can be used as a food coloring agent or cocktail.
